# Table of Contents

List	UC: List - Browse or Search CDs
Buy	UC: Buy - Add to Cart
Order	UC: Order - Submit Order
Account	UC: Account - Create Account

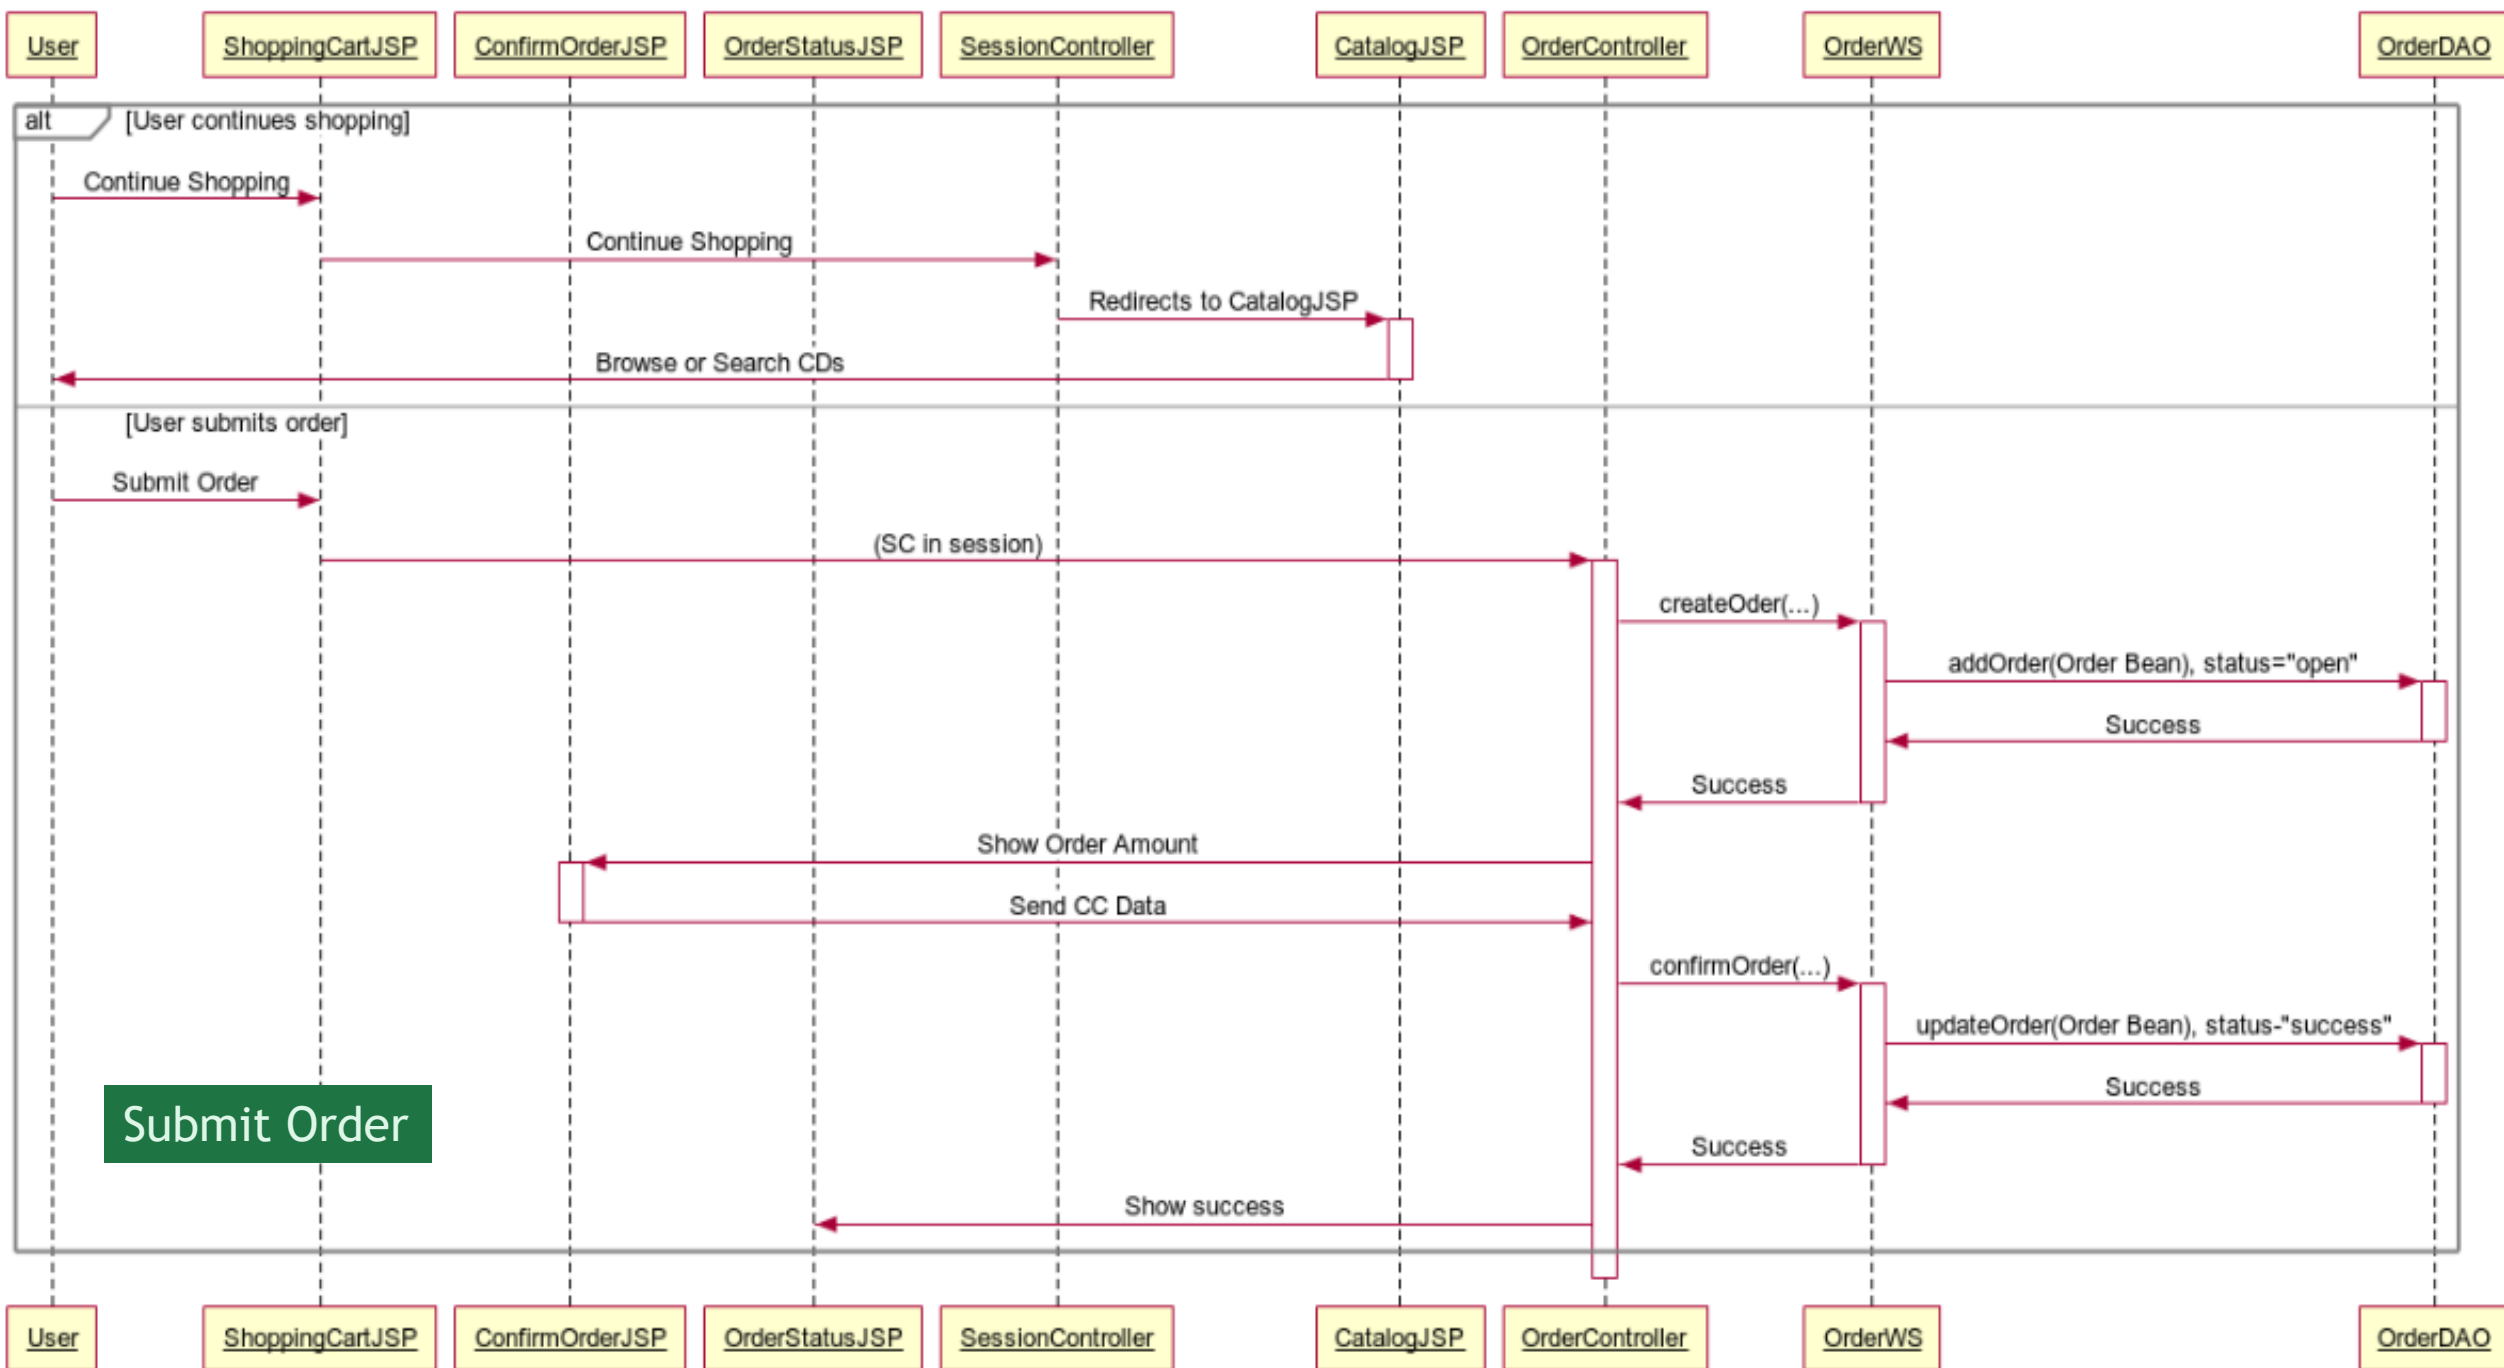

## UC: List - Browse or Search CDs

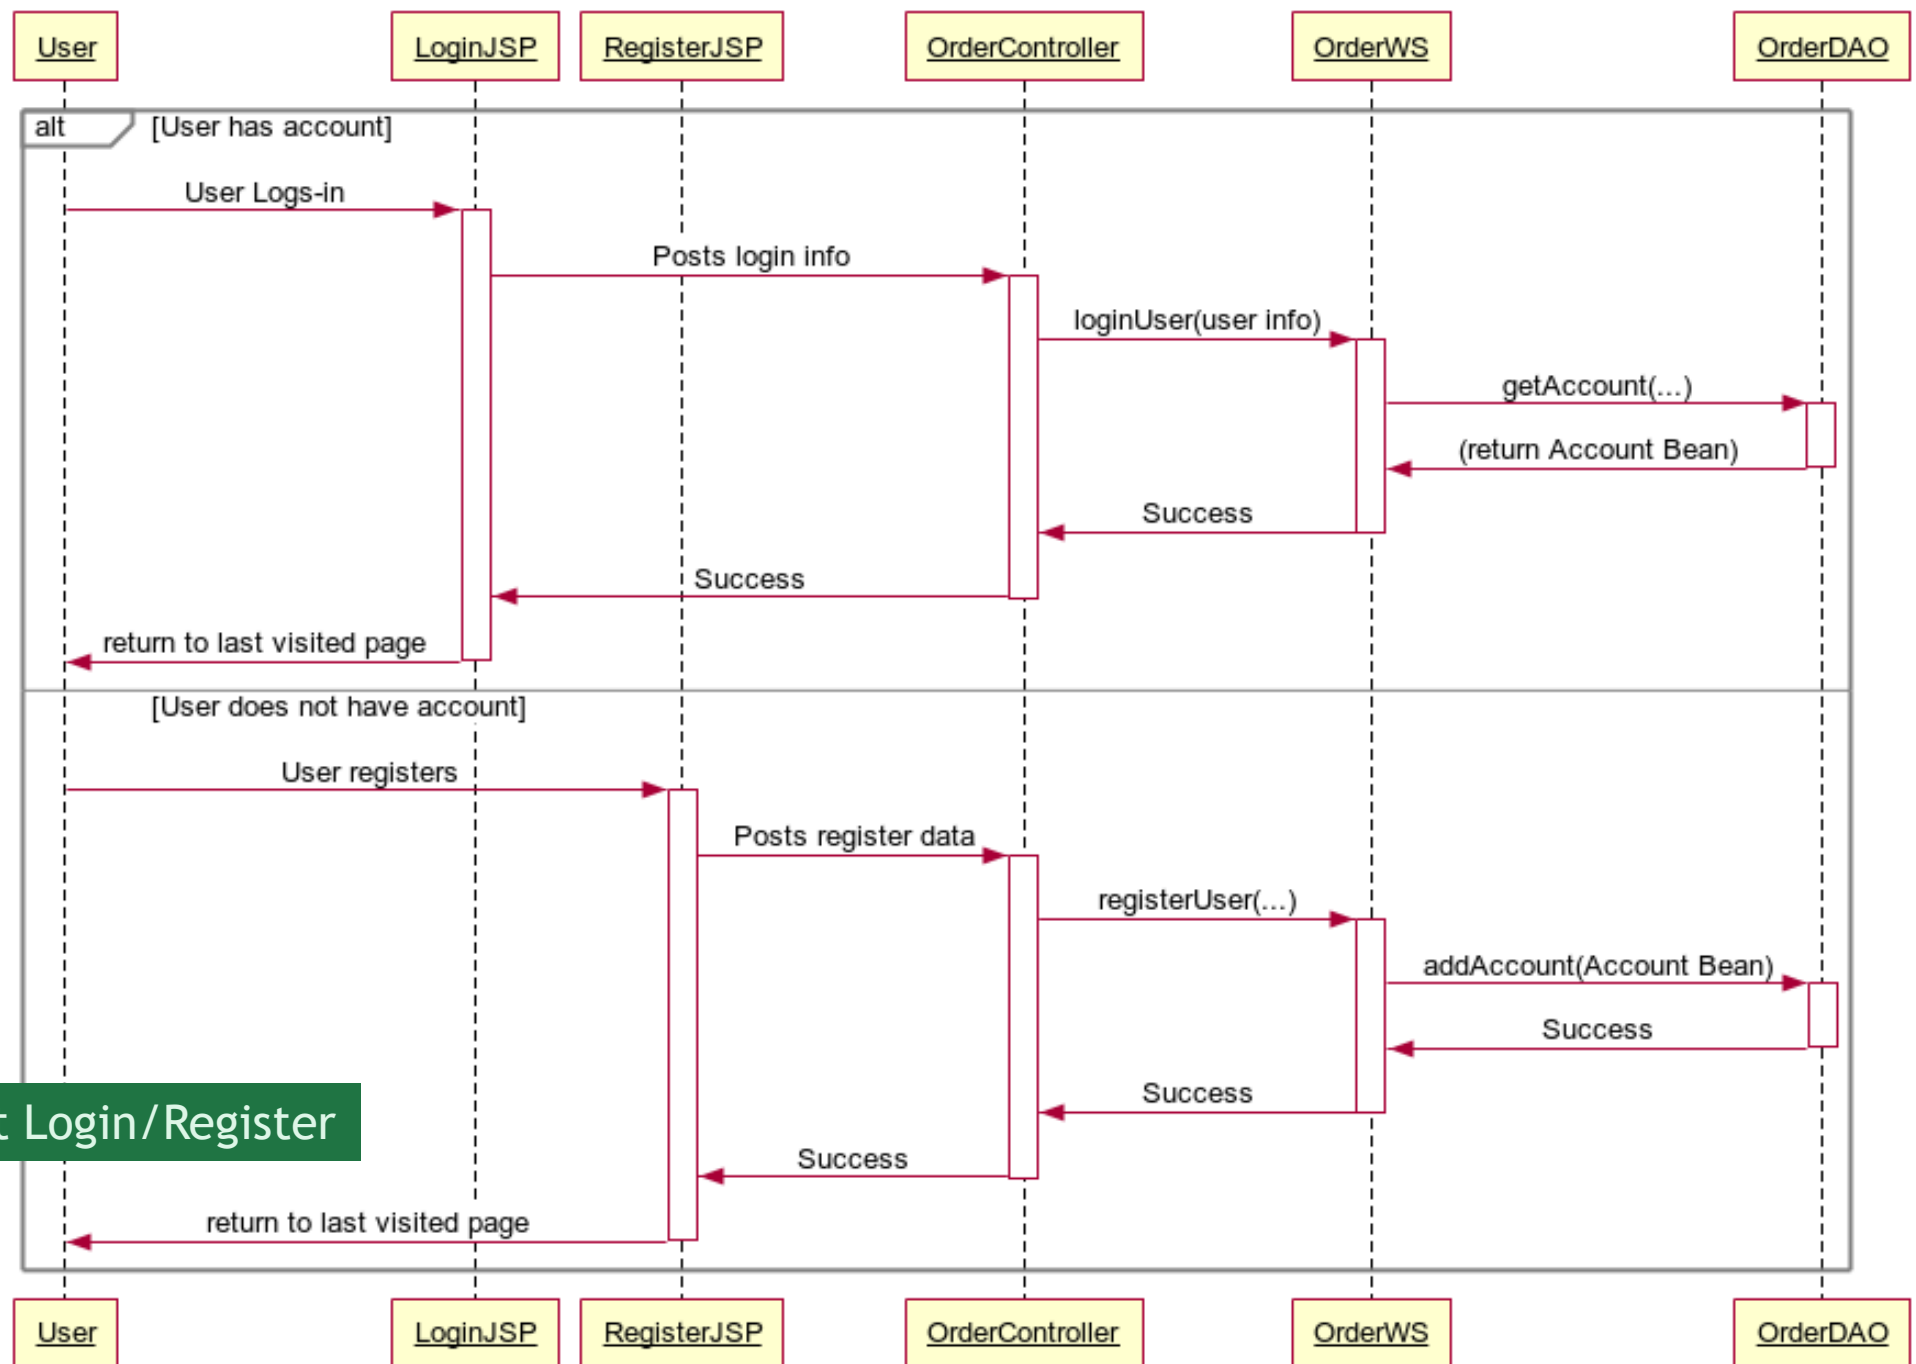

- A list of CDs is stored in the session and retrieved by

Use Case: Buy a CD

Account Login/Register

# Notes

- The sequence diagrams don't illustrate failure paths, only success.
- There is one other case:
  - A user returns to a shopping cart and tries to purchase it but they are not logged in.
  - The OderController should detect this and send them to the LoginJSP
    - If User clicks submit order and it is not logged in, send to Login
      - If use doesn't have account, they can register
    - Else submit order
